

Hyeonji Bae

Graduate Researcher, E-BRL (Ewha BioRobotics Lab)

hyeonji.bae@ewha.ac.kr · hyeonji-bae.github.io · github.com/Hyeonji-Bae · linkedin.com/in/hyeonjibae · Seoul, South Korea

M.S. student in Mechanical and Biomedical Engineering at Ewha Womans University, focusing on robot control.

Experience in integrating and evaluating teleoperated surgical robotic systems; next direction is learning-based control that incorporates dynamics models.

EDUCATION

- | | |
|---------------------|--|
| Mar 2025 – Feb 2027 | M.S. (in progress) , Mechanical and Biomedical Engineering
<i>Ewha Womans University, Seoul, South Korea</i> <ul style="list-style-type: none">GPA: 4.26 / 4.3 (to date)Thesis (in progress): Frequency-response (Bode plot) evaluation of the responsiveness and consistency of a unilateral (no force feedback) teleoperation system, and latency reduction |
| Mar 2021 – Feb 2025 | B.S. , Mechanical and Biomedical Engineering
<i>Ewha Womans University, Seoul, South Korea</i> <ul style="list-style-type: none">GPA: 3.71 / 4.3 |

RESEARCH EXPERIENCE

- | | |
|---------------------|--|
| Aug 2025 – Jul 2026 | Research Mentor
<i>R&E Program, Seoul Science High School, Seoul, South Korea</i>
Supported a student R&E research project and its subsequent paper revisions, under the primary supervision of the faculty advisor. |
| Mar 2025 – Present | Graduate Researcher (M.S. Student)
<i>E-BRL (Ewha BioRobotics Lab), Ewha Womans University, Seoul, South Korea</i> <ul style="list-style-type: none">Improving this teleoperation system (e.g., reducing time delay) and quantitatively evaluating its responsiveness and consistency (frequency response, bandwidth, time constant) for the M.S. thesis |
| Jul 2023 – Feb 2025 | Undergraduate Research Intern
<i>E-BRL (Ewha BioRobotics Lab), Ewha Womans University, Seoul, South Korea</i> <ul style="list-style-type: none">Integrated the leader input device, the surgical-instrument follower robot, and PC-based control software into the teleoperation system used in the IEEE Transactions on Haptics paper listed below |

PROJECTS

- | | |
|------|--|
| 2024 | Camera-Based Self-Moving Rescue Air Mat (Capstone Design) <ul style="list-style-type: none">Real-time object detection (OpenCV, YOLO) and wheel control |
| 2023 | SAR: Lower-Limb Wearable Robot for Fall Prevention
<i>Supported by the Challenge Semester program, Ewha Womans University (Fall 2023)</i> <ul style="list-style-type: none">IMU data preprocessing, SVM-based gait classification, and Arduino-based control of a high-torque actuator |

TEACHING

BioRobotics (Fall 2024)

Teaching Assistant, Ewha Womans University. Led about 10 hands-on ROS 1 lab sessions and graded assignments and lab reports.

HONORS AND AWARDS

2025	Outstanding Ewha Scientist Scholarship (Half Tuition) <i>Ewha Womans University</i> Two years (Mar 2025 - Feb 2027) of half-tuition support for Ewha graduates with an undergraduate GPA of 3.5 or above.
2024	Silver Award, 2024 Ewha Engineering Capstone Design Contest (Single-Major Division) <i>Center for Innovation in Engineering Education, College of Engineering, Ewha Womans University</i> Team of five, for the capstone design project on the rescue air mat.

SKILLS & LANGUAGES

Programming	Python, MATLAB
Robotics Middleware	ROS 1
CAD	SolidWorks, Fusion 360
Languages	Korean (Native speaker); English (Working proficiency (TOEFL iBT 97, 2025))
Certificates	TOEFL iBT (Score 97), ETS (2025); Modern Robotics (Northwestern University), Coursera (2023)
